

A DYNAMIC BUSINESS PARTNER

SEA SALT

PRODUCT BROCHURE 2025 / 2026

— VIETNAM → JAPAN · INDUSTRIAL & FOOD SALT

NATURAL REFINED SEA SALT

100% natural sea salt for de-icing, water treatment and industrial processing, supplied from Vietnamese salt works to Japanese buyers. Bought direct at source, with third-party analysis issued for every shipped lot.

Road de-icing — HS 2501

Free flowing coarse grain, water-insoluble matter not detected

Water treatment & softening

NaCl $\geq$ 95%, low Ca, Mg and SO₄, heavy metals not detected

Industrial processing

Tanning, dyeing, mineral feed and general chemical use

Packing to your process

25 / 50 kg bags, 500 / 1,000 kg PE-lined jumbo bags

A Vietnam–Japan trade bridge, not simply a salt trader.

DBP Trading Investment Consulting Co., Ltd. is an import–export house connecting Vietnamese factories and farms with Japanese buyers — salt, fresh and processed produce, seafood, nuts, coffee and packaging materials. We source directly from producers, negotiate specifications on your behalf, control quality before loading, and stay with the order through logistics and after-sales. Our founder lived and worked in Japan for seven years, so documentation, communication and follow-up are handled the way Japanese buyers expect them to be.

01**Japanese business culture from the inside**

Seven years living and working in Japan. Keigo-level correspondence, precise specification sheets, no surprises.

02**Direct from the factory**

Salt is bought at source, not through layers of brokers — so price, grain size and moisture stay under our control.

03**Support across the whole order**

Sample, specification, contract, inspection, shipping documents and after-sales — one responsible counterpart.

HOW WE WORK — TRUST**T****Trust**

We keep what we commit to, in writing.

R**Respect**

For your standards, culture and time.

U**Understanding**

We ask before we quote.

S**Support**

We do not disappear after shipment.

T**Tenacity**

Difficult issues are followed to the end.

Natural Refined Sea Salt

100% natural sea salt · HS 2501 · Origin and manufacture: Vietnam

BASIC SPECIFICATION

Product name	Natural Refined Sea Salt
Ingredient	100% natural sea salt
NaCl	≥ 95%
Moisture	≤ 3% or ≤ 6% (buyer's choice)
Grain size	≤ 1.0 mm or ≤ 0.5 mm
Foreign impurities	≈ 0% — nylon, metal, hair, dust absent
GMO status	Non-GM raw material, no GM cross-contamination
Shelf life	24 months
Storage	Cool, dry place below 60% humidity, away from direct sunlight

SENSORY

Colour	Light white to crystal white
Appearance	Coarse grain, free flowing
Odour	Characteristic of the product
Taste	Salty, characteristic of the product

Refined sea salt, ready for bagging.

LABORATORY PARAMETERS

CRITERIA	UNIT	TEST METHOD	RESULT
Calcium (Ca)	%	TCVN 3973:1984	0.2% ± 0.3
Magnesium (Mg)	%	TCVN 3973:1984	0.10% ± 0.3
Sulfate (SO ₄)	%	TCVN 3973:1984	0.7% ± 0.3
Water-insoluble matter	%	TCVN 3973:1984	Not detected
Iodine	%	TCVN 3973:1984	Not detected
Lead (Pb)	mg/kg	QUATEST3 1096:2023 (ref. AOAC 973.35)	Not detected
Cadmium (Cd)	mg/kg	QUATEST3 1095:2023 (ref. AOAC 973.35)	Not detected
Arsenic (As)	mg/kg	TCVN 8427:2010	Not detected
Mercury (Hg)	mg/kg	QUATEST3 1096:2023 (ref. AOAC 971.21)	Not detected
Copper (Cu)	mg/kg	QUATEST3 1113:2023 (ref. AOAC 999.11)	Not detected

Values are typical results from accredited third-party testing. A certificate of analysis for the actual lot is issued with each shipment; specifications can be adjusted to your standard on request.

Specified for winter road de-icing — and for industry year-round.

Road de-icing

Free-flowing coarse grain with water-insoluble matter not detected — spreads evenly and leaves minimal residue on road surfaces.

Water treatment & softening

Consistent NaCl above 95% with low Ca, Mg and SO₄, and heavy metals not detected in third-party testing.

Industrial processing

Tanning, dyeing, animal mineral feed and general chemical use — grain size and moisture set to your process.

Seasonal stockpiling

24-month shelf life in dry storage, so volume can be secured ahead of the winter season rather than during it.

PACKING OPTIONS

PP / PE bag	25 kg or 50 kg
PE-lined jumbo bag	500 kg or 1,000 kg
Marking & palletising	To buyer's instruction

HANDLING

Handle carefully to minimise dust generation. Provide adequate ventilation and avoid contact with eyes and skin.

HOW TO PROCEED

1. Send us your required grain size, moisture and annual volume.
2. We return a certificate of analysis and a written quotation.
3. Free sample is shipped for your laboratory approval.
4. Contract, inspection before loading, shipment, documents.

Prices, Incoterms and lead time are quoted per enquiry, based on grain specification, packing and destination port.

QUALITY ASSURANCE ON EVERY SHIPMENT

Certificate of analysis per lot

Third-party laboratory results issued for the actual shipped lot, not a generic sheet.

Inspection before loading

Grain, moisture and packing are checked at the factory; photos are sent before the container leaves.

Non-GMO declaration

Raw material is not derived from GM material and is protected from GM cross-contamination.
